

Transforming Life Safety in India: 4EVAC- A Bosch company, Partners with Alphatec to Deliver Next-Generation Voice Alarm Solutions

Mumbai, XX June 2025 – 4EVAC, a Bosch Company and a globally renowned manufacturer of Voice-Alarm Control and Indication Equipment (VACIE), announces its official entry into the Indian market through a strategic partnership with Alphatec, a leading Mumbai-based distributor of premier audio and video solutions with pan India presence. This collaboration marks a significant leap in emergency communication technology, addressing the evolving safety standards and infrastructure demands across India's commercial, industrial, and public sectors.

With India emerging as the third-largest pro-AV market in the Asia-Pacific region, the nation is witnessing rapid advancements in fire safety regulations, public address systems, and emergency evacuation solutions. The growing need for intelligent, scalable, and standards-compliant life safety systems has set the stage for compact, modular, and cost-effective technologies.

In alignment with these industry trends, 4EVAC's cutting-edge VACIE solutions now provide Indian businesses and public institutions with a new generation of voice alarm control systems, ensuring seamless emergency communication and life safety excellence.

Strategic Partnership to Revolutionize Life Safety

Speaking about the partnership, **Roberta Marchetti, Account Manager at 4EVAC**, said, *"Our entry into the Indian market is a landmark moment for 4EVAC. Selecting the right partner is critical when expanding into new territories, and Alphatec's expertise and commitment to delivering advanced AV solutions made them a natural fit. Together, we aim to redefine life safety and emergency communication across India, offering state-of-the-art, reliable, and scalable VACIE systems."*

Devasis Barkataki, Founder & Managing Director of Alphatec, expressed his excitement, stating, *"Our partnership with 4EVAC, A Bosch Company—a leader in European Voice Alarm Control and Indication Equipment (VACIE)—empowers Alphatec to deliver cutting-edge emergency communication solutions to Indian enterprises, system integrators, and AV consultants. We aim to establish 4EVAC as the definitive choice in life safety technology, synonymous with innovation, reliability, and superior quality. This collaboration strengthens our commitment to transforming India's AV industry with pioneering solutions."*

Innovative Product Lineup & Market Impact

Leveraging over 30 years of expertise in voice alarm manufacturing, 4EVAC- A Bosch Company, integrates the latest advancements in audio distribution technology. The company's IMPACT Voice Alarm System, featuring remote-controlled zone expanders and multimedia applications, is designed to simplify installation while enhancing scalability and efficiency.

Among its standout innovations is the Compact500, a powerful yet space-efficient wall-mounted voice alarm control panel, offering streamlined digital audio distribution on a networked VACIE platform. Designed to eliminate the complexity of traditional rack-mounted systems, 4EVAC's solutions bring user-friendly, high-performance emergency communication to the forefront of modern safety infrastructure.

About 4EVAC

Based in Rotterdam, Netherlands, 4EVAC-A Bosch company, is a trading division of Hacousto Holland BV, dedicated to delivering VACIE systems that break the mold of traditional emergency communication solutions. Led by Iker Saenz and his team, 4EVAC remains committed to innovation, cost-effective system design, and next-generation life safety technology.
